This book is very new to me. Though it is one of my favorite topics in books or in TV series. There were exercises and each are awesome realizations on how we can better control our life by changing our brain and mindset. Most leadership training discusses paradigm shifting which is somehow similar to the topic discussed in this book. The author is very brilliant in analyzing the assumptions that affect our way of thinking and our brain. Thus he provided the reader with an exercise that can be a practical guide to better achieve paradigm shifting.

I am positive that with the help of this book I can guarantee a huge change in my personality and mentality. Being able to practice my mindset into positivity helps me to have a strong will in every decision I make plus I could practically relate it to every advice I make to my clients which somehow links us both in understanding each other easily.

I really liked this book. It has some really practical and easy-to-follow exercises, and for me personally, I enjoyed reading about the NLP in work, parenting and relationships section. I liked the outline here since this section came just after all the 10 exercises that were described in the book!! I think a lot of people would benefit from some of the content within this book, and it is very cheap to buy. The only negative I could come up with was the formatting, it was a bit weird in a few places, but nothing huge though. Overall a really nice read!
