Customer Reviews

This is quite an awesome book for me! I like everything inside this book. This is a good read especially for those who are starting to build their career in the industry that they have chosen. This book just teaches everyone how to make yourself stand out in the midst of the other aspiring candidates or office workmates for a potential lift of position. I got inspired by the author's belief that the mantra of being visible is to build a brand "you". Wherein you can find in this book how you can start doing branding yourself and be on top of it. There are a lot of tips that I believe are very useful in making people know your worth and value you as an individual. I also like the fact that the author was able to recognize the effectiveness of social selling, this only means that dealing with people and how you treat them is one key ingredients to success.

Working in a normal 8 hours day job, and you spend most of your time at work and with your colleagues, as well as supervisors and managers, but after so many years, you are still stuck in that same position, doing the same work. It will be boring. After reading this book, I have realized, that I am not socializing that much with others, and that makes me invisible, people do not know me by my name, but only know me by my face. There are a lot of tips and guides on this book that I can use. I liked that topic about how to become visible, what are the things that I could do and how do I do that. It was an informative book for me. Great read.

This is a very well written book and talks about the topic that has not been touched upon by many authors in the past. We put a lot of focus on working hard and being diligent in our professional life only to realize that the rewards are just not at par with efforts. It is always a mystery for most people to figure out what is missing. This book is the missing piece. Lot of great tips and ideas, not just at workplace but for life in general. No matter what your position in the organization is or at what stage of life you are at, this book can teach something to everyone. Highly recommended.

It has great tips and it is by one means or another motivating to those individuals who needs to be perceived. This is particularly imperative in the event that we work remotely, in light of the fact that individuals may disregard us on the off chance that they don't frequently see us in individual. I preferred that point about how to end up unmistakable, what are the things that I could do and how would I do that. It was an instructive book for me.

I bought the book and it is packed full of useful information. I learn how to make an impact so that I could be visible to my organization with the position that I am in and could help me prevent in

getting my dues. It has good tips and it is somehow inspiring to those people who wants to be recognized. This book explains how to get visible in your company and make others see your results and work.

I think the book is a good eye opener for all the hard workers out there who are not recognized. I think the book gave good advises on how to shine among your co-workers. I think being part of an organization is a good thing but being on top of it is even better that is why I purchased the book. It has good tips and it is somehow inspiring to those people who wants to be recognized.

Excellent book .I bought the book and it is packed full of useful information. This book is easy to read, offers helpful resources, and gives me the confidence that I can actually do this without technical skills. Keep it handy because you will find it has a wealth of information.

In this book I learn how to address the issues that I am facing with my organization. I learn how to make an impact so that I could be visible to my organization with the position that I am in and could help me prevent in getting my dues. A step by step tool that means a lot to me!
