Customer Reviews

Half of this book is about famous paleontologists, what dinosaurs are, and how they became extinct. The next half has at least 80 pictures and paintings of different species of dinosaurs, and a description of their characteristics and how they live. I would especially recommend it to 11 and 12 year olds who know their dinosaurs. WARNING: This is not a little kid's book. It does contain A LOT of information. It has at least a page on each species of dinosaur, but I think it should go into even more detail on these amazing animals.

I am a special education teacher I highly recommend this book it's a great book with great pictures in great condition...thank you
