Remote Sensing And Smart City (With Transactions On Information And Communication Technologies)

Synopsis

Presenting the proceedings from the 2014 International Conference on Remote Sensing and Smart City (RSSC2014) held in Shenzhen, China, this book contains research papers from two areas: 'Remote Sensing' and 'Smart City'. The book's extensive scope ranges from machine learning algorithms to models of real nervous systems. Proceedings topics within the book include: Geoinformatics; Geodesy and Mine Surveying; Photogrammetry and Remote Sensing; Cartography and GIS; Energy and Clean Technologies; Science and Technologies in Geology, Exploration and Mining; Water Resources, Forest, Marine and Ocean Ecosystems; Ecology, Economics, Education and Legislation; Nano, Bio and Green: Technologies for Sustainable Future; Beidou Satellite; Smart City; Sensor Network; Ecology River-network and Urban Planning Norms and Intelligent Transportation System.

Book Information

Series: Wit Transactions on Information and Communication Technologies

Hardcover: 604 pages

Publisher: Wit Pr/Computational Mechanics (January 9, 2015)

Language: English

ISBN-10: 1784660299

ISBN-13: 978-1784660291

Product Dimensions: 1.5 x 6.2 x 9.5 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Average Customer Review: 1.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #2,025,862 in Books (See Top 100 in Books) #444 in [Books > Computers & Technology > Graphics & Design > Computer Modelling > Remote Sensing & GIS](#) #462 in [Books > Science & Math > Earth Sciences > Geography > Information Systems](#) #667 in [Books > Textbooks > Computer Science > Artificial Intelligence](#)

Customer Reviews

It is about GIS Technology that requires the colour to demonstrate the concept, but, the printing is B/W. Worst out of all, the printing quality is poor and some pictures are blur.
