Land Of The Underground Rain: Irrigation On The Texas High Plains, 1910-1970

Synopsis

The scarcity of surface water which has so marked the Great Plains is even more characteristic of its subdivision, the Texas High Plains. Settlers on the plateau were forced to use pump technology to tap the vast ground water resourcesâthe underground rainâbeneath its flat surface. The evolution from windmills to the modern high-speed irrigation pumps took place over several decades. Three phases characterized the movement toward irrigation. In the period from 1910 to 1920, large-volume pumping plants first appeared in the region, but, due to national and regional circumstances, these premature efforts were largely abortive. The second phase began as a response to the drouth of the Dust Bowl and continued into the 1950s. By 1959, irrigation had become an important aspect of the flourishing High Plains economy. The decade of the 1960s was characterized chiefly by a growing alarm over the declining ground water table caused by massive pumping, and by investigations of other water sources. *Land of the Underground Rain* is a study in human use and threatened exhaustion of the High Plains' most valuable natural resource. Ground water was so plentiful that settlers believed it flowed inexhaustibly from some faraway place or mysteriously from a giant underground river. Whatever the source, they believed that it was being constantly replenished, and until the 1950s they generally opposed effective conservation of ground water. A growing number of weak and dry wells then made it apparent that Plains residents were "mining" an exhaustible resource. The Texas High Plains region has been far more successful in exploiting its resource than in conserving it. The very success of its pump technology has produced its environmental crisis. The problem brought about by the threatened exhaustion of this resource still awaits a solution. This study is the first comprehensive history of irrigation on the Texas High Plains, and it is the first comprehensive treatment of the development of twentieth-century pump irrigation in any area of the United States.

Book Information

Paperback: 326 pages

Publisher: University of Texas Press; Revised edition (July 1, 1981)

Language: English

ISBN-10: 0292746296

ISBN-13: 978-0292746299

Product Dimensions: 6 x 0.7 x 9 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)
