Score Big At The Harness Track!

Synopsis

You can pick the horses pretty good, but you can't make any money at the track? You've got money to wager, but you have trouble with predicting race outcomes? You enjoy the challenge and sport of harness horse racing, and you'd like to enhance that enjoyment with some real profit? This is the book for you! SCORE BIG AT THE HARNESS TRACK is the first book to instruct you in the two equally essential skills of both handicapping and wagering. Either one is worthless without the other! Both beginners and experienced bettors will find a wealth of new approaches here. This book is divided into two sections, one for each skill. You'll find that this is not a listing of "systems" and "shortcuts" that have been so often presented by others. You may well have already found that such "generic" approaches tend to produce negative results. Instead, this is a textbook intended to instruct you how to build a profitable system of your own, individually tailored to the specific track or tracks you like to play. (Each one is different, and requires a unique approach.) The tools that you will develop will be your keys to success. This is not a book for the lazy. Implementing the elements of a winning system will require some effort on your part. Let the lazy bettors feed the pools. Use the power of your own intelligence to "withdraw" a significant number of those dollars for your own bank account. You can do it!

I really appreciate all of the tips from this publication and the knowledge which Bad Bill has experienced over the years with harness racing. I have been an avid harness horse owner over the last 25 years and the statistics in wagering are complex to say the least. I feel that Bill has explained in great detail an easy way for a beginner and even an for the experienced bettors to understand

how to place a bet at the race track. I recommend this publication for anyone interested in making a good decision on a bet and hope you put a little coin in your pocket at the same time.

If your new to the sport then you will get something out of this, but it is no different than any other basics book, and very basic at that. The author claims you have to study and come up with a system in order to win compared to others that don't spend any time and feed the pools with money, but never goes into anything other than saying stuff like - Does jockey win percentage matter? It might, it depends on the track, keep records and find out this is the type of advise you get from this book, and in my opinion, very vague and no real help.

As always..."Bad Bill" never disappoints!!! I have read other books by this author, and I have read other books on harness racing, and this one is the best by far!!! His reasoning and logic behind his lessons is amazing and makes a lot of sense! LOVE this book! I recommend this book for anyone from beginners to experienced "betters" like myself! High Five Bill!

I have a large collection of books on harness racing. After reading McBride's new book I feel like throwing all of the others away! His writing is very reader friendly, his lessons well-presented, and his logic rock-solid. I wish I had this knowledge years ago. This is a book that is great for both beginners and experienced bettors. Thanks, Bad Bill

This is the book I've been waiting for! It's the first time anyone has addressed BOTH elements of the game, handicapping AND wagering! I would say that this book should be the last on this topic that should ever need be written. Well done, McBride!

If you only have one book to buy make sure it is this one. Bill explanation is spot on that you can't use a mechanical system to work for every type of race. His approach is to take each track and look for patterns specific for that track. He does list different criteria that could be used to look for a winning approach.

I really do have to say, not being a big better on horses, that this book is awesome! It teaches you, from the get go, how to pick and choose the horse, and the explanation is really and truly for everyone. So informative and easy to understand! Which is half the battle, while trying to pick a horse, from the field of many! Thank you, Mr. McBride for the book of choice, to take to the track!
