Excellent guide to the different leadership styles to effectively manage your team and employees. Being in the sales industry, I'm aware of the importance of having a leader or manager that understands the various types of management practices to best get the most productive performance. I personally like the 'hands off' approach, but each situation and individual will be different and respond & be motivated by various leadership methods. This book is well written and explains the process of leadership effectively. Highly recommend.

I'm in a position where I'd like to step up and be more of a leader (climb that corporate ladder) so this book helped a lot in determining what type of leadership skills I would need as well as going into all the various styles of leadership which I had never heard about. So it was interesting to get that perspective. The book was really good at giving bulleted points and notes about each leadership style which was very helpful. Plus, it was the most helpful for helping me determine which styles would be best in my industry. The only thing was I wish it had example or stories to illustrate the leadership style. Other than that it was an excellent leadership book.

This book provides huge information about leadership and helps a lot in determining what type of leadership skills I would need as well as going into all the various styles of leadership which I had never heard about. Some people are born with a natural tendency to lead others, whilst many people are simply looking for someone to provide them with safety, nurture and support. Some things are just removed we all need to remind ourselves as we get caught up in work and the ever-changing environment most of us are a part of. I like that this book is written in a friendly manner and does not just simply give you the things that you have to do but also gives you good background on each instruction that would really help you find the reason fundamentally.

For me, a leader is someone that other people look to for new ideas. While a title can make you leader on the surface, becoming a true leader takes a bit more than that. There's so many characteristics a leader needs to have such as a high self-esteem, self-confidence, determination, motivation and there's a long list of requirements. For a person to be a leader, he or she has to think, act and practice like a leader and this book is the perfect guide. Highly recommended.

A leader is a more remarkable word that leave all of us by question who the leader is. I thank the writer for defining a leader as someone who is a role model in terms of trust and ideas. According to him, a leader takes full responsibility on the job at hand. I have also learnt that confidence is key pillar to leadership. The next time i want to choose my leader either in government or work place, i will be able to eliminate the candidates to choose the most qualified person

Some people are born with a natural tendency to lead others, whilst many people are simply looking for someone to provide them with safety, nurture and support. There is an essential demand for all types of people; leaders are not necessarily the best people to actually get the job done. They are the ones that can motivate and inspire people with the necessary skills; this is why it is essential to acknowledge every member of a team. I learned a lot from this book and it became a huge part of the milestone I am executing in my work life and personal life as well.
