# Prepper Guns: Firearms, Ammo, Tools, And Techniques You Will Need To Survive The Coming Collapse

## Synopsis

Food, water, and shelter are very important to survival. But you must also be ready to protect what is yours, because if somebody stronger, better prepared, and better equipped takes it all away, you will die. Your family will die. The only way to protect them is with firearms. Written with the law-abiding civilian in mind, *Prepper Guns* covers the firearms and tools needed to survive, not only for defense, but also for foraging. It is a comprehensive look at the realities of the firearms a prepper should have. Written by Bryce M. Towsley, a firearms expert and a full-time gun writer with thirty years of experience, it steps away from the "conventional wisdom" that is often spouted by prepper publishing and takes a hard, honest, look at the reality of the firearms, ammo, tools and training needed to survive at home and on the road. *Prepper Guns* takes a careful look at each category of firearms, ammo, sights, and accessories. Other topics include gun care and maintenance, as well as some simple gunsmithing and reloading to keep firearms repaired and ammo on hand. Finally, *Prepper Guns* has training suggestions and drills, plus a look at the psychology of survival, using the expertise of some of the top people in the world in these fields. If you are worried that bad things are coming and are trying to prepare, this book is the most important piece of gear you can buy. Because if you can't protect your family, your food and your home, nothing else really matters.

## Book Information

Hardcover: 272 pages

Publisher: Skyhorse Publishing (May 17, 2016)

Language: English

ISBN-10: 1634505875

ISBN-13: 978-1634505871

Product Dimensions: 8.1 x 1.2 x 10.6 inches

Shipping Weight: 2.7 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (19 customer reviews)

## Customer Reviews

This is a well written and informative book. I don't necessarily agree with all of the author's, political and world views etc. however he puts these across in an entertaining way, and I have an

appreciation for direct, and forthright views, even if I don't agree with them. I will caveat this review by stating I am no gun expert, however I do shoot, and have an interest in firearms - my interest/expertise is in unarmed self defense (I am the author of "Krav Maga - Real World Solutions To Real World Violence"). Firstly, you don't have to be a Prepper, or even believe in the complete breakdown of society to get a lot from this book. There have been enough examples of "temporary" breakdowns in society, such as the LA riots in 1992, to disasters such as Hurricane Katrina, to demonstrate the possibilities of extreme situations etc. Even if you aren't looking for survival strategies in such situations, this book still has a lot to offer...The book reviews the roles that different firearms can play in different scenarios (and the author has many good points to make on this), and makes a good case for specificity regarding firearms e.g. don't look to use a hunting rifle for home defense, instead choose the right tool for the job etc. He also takes the time to discuss the relative merits of full and semi-automatic weapons, and makes many sensible and practical points concerning this (It was around this part in the book, that I started to take the book more seriously, as the practical arguments took over from the political). Although I don't fully agree with his reasoning on ammunition choices, he argued and explained, the different viewpoints well, and everything he said on the matter was sound.
