Synopsis

NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, and registrations are not transferable. To register for and use Pearson's MyLab & Mastering products, you may also need a Course ID, which your instructor will provide. **Used books, rentals, and purchases made outside of Pearson** If purchasing or renting from companies other than Pearson, the access codes for Pearson's MyLab & Mastering products may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. **Prepare. Practice. Review.** Mike Sullivan's time-tested approach focuses students on the fundamental skills they need for the course: preparing for class, practicing with homework, and reviewing the concepts. The Tenth Edition has evolved to meet today's course needs. **Note:** You are purchasing a standalone product; MyMathLab does not come packaged with this content. MyMathLab is not a self-paced technology and should only be purchased when required by an instructor. Customer Reviews

I've never been a fan of Algebra, but this book had me quite excited to get started. The book is packed with information and it's not for those with a weak heart. There is very little spacing between the explanations, the examples, and the practice problems. The good thing about this book is there are a ton of Practice Problems which will help you perfect your understanding of the material. The bad thing... the answers in the back of the book are not the full answers. Most chapters only have the odd numbered answers which makes it hard to figure out if you're getting the other questions correct. From what I understand, the Student's Solutions Manual for College Algebra that is sold as a separate book, only provides the solutions to the odd numbers as well. The best part about this book is it's integration with MyMathLab. I believe your instructor can have your course setup per their own specific options, but in general, you'll see practice, homework, quizzes, and tests. The practice is awesome! There are about a ton of questions that you can work on and get the answers to, along with having MyMathLab "Help Me Solve This" or "View and Example" options. This is the best way to learn this stuff. Be prepared though, these exercises will take you a long time if you plan to work through them all. After you finish the problems you can take a quiz to earn "Mastery Points" which are a great way to determine how well you've learned the material. From there you will move on to the actual homework, quizzes, and tests.
