Customer Reviews

I do not like writing my own reviews but I have to respond to the completely unfair comment by the "Doctor" below. The book is not a criticism piece but a guide to help tourists to find their way around each of Utah's 13 resorts. Trail maps are easily accessible, change from year to year and provide a very limited view of the actual terrain. The book is designed to help people navigate each ski area and get comfortable with the terrain. Most people who come to Utah visit one or two locations, ski three or four runs they know are safe and leave. There is a lot of GOOD about each spot and this book is about making the most of a vacation. If you are going to any of Utah's 13 resorts, this book tells you a lot more than what a trail map provides. I skied and snowboarded at each resort and tried to give you a good idea of where to go on the mountain based upon being a first time visitor. Moreover, the book provides tips on how to save money and offers a good overview of what each resort offers. Most professional reviewers have found the book to be a great way to familiarize yourself with Utah's resorts. In fact, read the review below by the Midwest book review. I know each resort intimately and I know where they have their faults. However, how is this data useful to people

and what would be achieved by writing something critical? I take offense on the "Rainbow and Unicorns" comment for trying to show each resort's best side. In reality, any person with half a brain will recognize that each spot has its faults. I simply am trying to help people have a great vacation, understand what each resort is focused on doing well and have a lot of fun during their visit to Utah!
